

Tuscola High School
Advanced Placement Calculus Course Application
2011 – 2012

Hello, mathematician! I am glad to see that you are interested in AP Calculus for next year.

AP Calculus is a college-level course that is equivalent to about three fourths of a year of college calculus. The course is based on the College Board's Advanced Placement Calculus AB curriculum, with the purpose of "developing understanding of the concepts of calculus and providing experience with its methods and applications."

To do well in AP Calculus, you should be able to say "Yes" to all of these questions:

- Do you have mostly A's and B's in Precalculus?
- Are you willing to work as hard as you can to reach your potential?
- Are you willing to do all of the assignments, regardless of how much effort and how much time it takes?
- Are you willing to come to school early or stay late when you need extra help?
- Are you motivated by a challenge?

If you answered "Yes" to these questions, you are a great candidate for AP Calculus at Tuscola High School!

Please fill out this brief application and return it to the Counseling Center on or before Thursday, January 27. The Counseling Center will not accept any applications after this date.
